

Master's in Industrial Electronics and Computers Engineering

University of Minho

8051 on FPGA

Embedded Systems Master's Degree

Authors: Embedded Systems 24/25 Class

Professor: Adriano Tavares

2024/2025

Contents

1	Introduction	1
1.1	Problem Statment	1
2	Analysis	2
2.1	FSM	3
2.2	Program Counter	4
2.3	Fetch	5
2.4	Decode	6
2.5	Memory Access	7
2.6	Execute	8
2.7	Writeback	9
2.8	Peripherals	10
2.8.1	Interrupt Controler	11
2.8.2	GPIO	12
2.8.3	PS2	13
2.8.4	Timer	14
2.8.5	UART	15
2.8.6	VGA	16
2.9	Pipeline	17
2.9.1	Cache	18
2.9.2	Hazard Control	19
3	Design	20
3.1	FSM	21
3.2	Program Counter	22
3.3	Fetch	23
3.4	Decode	24
3.5	Memory Access	25
3.6	Execute	26
3.7	Writeback	27
3.8	Peripherals	28
3.8.1	Interrupt Controler	29
3.8.2	GPIO	30
3.8.3	PS2	31
3.8.4	Timer	32
3.8.5	UART	33
3.8.6	VGA	34
3.9	Pipeline	35
3.9.1	Cache	36

3.9.2	Hazard Control	37
4	Implementation	38
4.1	FSM	39
4.2	Program Counter	40
4.3	Fetch	41
4.4	Decode	42
4.5	Memory Access	43
4.6	Execute	44
4.7	Writeback	45
4.8	Peripherals	46
4.8.1	Interrupt Controler	47
4.8.2	GPIO	48
4.8.3	PS2	49
4.8.4	Timer	50
4.8.5	UART	51
4.8.6	VGA	52
4.9	Pipeline	53
4.9.1	Cache	54
4.9.2	Hazard Control	55
5	Conclusion	56

Acronyms

UART Universal asynchronous receiver/transmitter

Chapter 1

Introduction

1.1 Problem Statment

Chapter 2

Analysis

Design

Implementation

2.1 FSM

Design

Implementation

2.2 Program Counter

Design

Implementation

2.3 Fetch

Design

Implementation

2.4 Decode

Design

Implementation

2.5 Memory Access

Design

Implementation

2.6 Execute

Design

Implementation

2.7 Writeback

Design

Implementation

2.8 Peripherals

Design

Implementation

2.8.1 Interrupt Controler

Design

Implementation

2.9 Pipeline

Design

Implementation

Chapter 3

Design

Analysis

Implementation

3.2 Program Counter

[Analysis](#)

[Implementation](#)

3.3 Fetch

Analysis

Implementation

3.4 Decode

Analysis

Implementation

3.5 Memory Access

Analysis

Implementation

3.6 Execute

Analysis

Implementation

3.7 Writeback

Analysis

Implementation

3.8 Peripherals

Analysis

Implementation

3.9 Pipeline

Analysis

Implementation

Chapter 4

Implementation

Analysis

Design

4.2 Program Counter

[Analysis](#)

[Design](#)

4.3 Fetch

Analysis

Design

4.4 Decode

Analysis

Design

4.5 Memory Access

Analysis

Design

4.6 Execute

Analysis

Design

4.8 Peripherals

Analysis

Design

4.8.2 GPIO

4.8.4 Timer

4.9 Pipeline

Analysis

Design

4.9.1 Cache

Chapter 5

Conclusion
